

**Cindy L. Christiansen, PhD**

**Co-founder and Chief Technology Officer, Aviation-Impacted Communities Alliance**

Cindy L. Christiansen is a Co-founder of Aviation-Impacted Communities Alliance (AICA) and BOS Fair Skies. She previously served as a member of the Massport and the Logan Community Advisory Committees. Christiansen co-authored the Technical Response for Congressional Quiet Skies Caucus Staffers Re: FAA's Report to Congress: DNL Metric and DNL 65 Standard for Airplane Noise, June 2020. Professionally, she is faculty at Boston University Henry M. Goldman School of Dental Medicine, is a health policy researcher with a PhD in statistics, and teaches statistics to graduate students. Christiansen has twenty-five years of experience on dozens of multidisciplinary health care, health policy, and medical studies at Boston University, Harvard Medical School, and Health Services Research Centers of Excellence at the Veterans Affairs. Much of her research involved development and use of valid metrics and statistical prediction models. She is a Fellow of the American Statistical Association.
