6/30/2022

The Honorable Eleanor Holmes Norton
Quiet Skies Caucus Chair
U.S. House of Representatives
Washington, DC 20515

Dear Chair Norton:

Thank you for your letter dated April 20, 2022, cosigned by members of the Quiet Skies Caucus, regarding the membership of the NextGen Advisory Committee (NAC). The NAC is a Federal Advisory Committee that operates in accordance with the Federal Advisory Committee Act (FACA). FACA requires Federal advisory committees “to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee.” 5 U.S.C. app. 2 § 5.

As stated in the NAC charter and NAC membership balance plan, the mission of the NAC is to provide independent advice and recommendations to the Federal Aviation Administration (FAA) and to respond to specific tasks received directly from FAA. The advice, recommendations, and tasks relate to concepts, requirements, operational capabilities, the associated use of technology, and related considerations to operations that affect the future of the Air Traffic Management System and the integration of new technologies.

The NAC maintains a membership of no more than 30 members. For the FAA to comply with FACA’s membership balance requirements and to align its investments, the NAC must maintain broad representation of the aviation community. NAC members are appointed to represent stakeholder domains. The FAA has carefully considered the number of representatives required from each stakeholder domain to provide input on the technical issues the NAC considers. Of the 30 members, one is designated to represent the community and environment stakeholder group.

In the coming months, a Federal Register Notice (FRN) will be published to solicit NAC membership applications for the next two-year term. While the FRN supports a transparent, diverse, and inclusive membership solicitation process, the membership will remain fixed at 30 members with the same domain representation. We invite qualified organizations to apply. We do not believe expansion of the NAC is warranted, however, we do believe in substantive communication and engagement with communities and we remain committed to that work.

While the Advanced Aviation Advisory Committee (AAAC) recently expanded its membership from 35 to 41 members, at its expanded size of 41, there is one seat designated to represent the

community stakeholder group. This expansion brings the community representation for the AAAC in line with the long-established representation on the NAC.

A community concern raised in your letter focuses on the metric used to evaluate noise impacts. We understand that some members of the public have expressed views that the standard metric used by the FAA, the day-night average sound level (DNL), is insufficient for assessing community noise impacts. The FAA is currently undertaking a review of the FAA noise policy, including the noise metric and thresholds. However, the noise policy topic, including defining, updating, or evaluating noise metrics, is not within the scope of the NAC. The FAA will proactively engage stakeholders and the public in the review of the current noise policy through a robust, thorough, evidence-based, and inclusive process. This will include participation opportunities for all stakeholders, including those that represent local communities.

Fundamentally, the agency agrees community input is important. The FAA has taken a number of concrete actions recently that demonstrate our commitment to this concept. The agency deployed the noise complaint initiative nationwide, published the neighborhood environmental survey, and initiated a full review of our noise policy. The FAA has completed nearly every noise related directives in the 2018 FAA Reauthorization Act. Additionally, the FAA developed and implemented “enhanced community engagement” initiatives to include routine participation at multiple airport-sponsored noise roundtables focused on building consensus recommendations and engaging airport noise officers.

Thank you again for reaching out on this topic. We are in agreement that transparency and public inclusivity is of the utmost importance.

We have sent identical letters to all cosigners.

If you or your staff need further assistance, please contact the Office of Government and Industry Affairs at (202) 267-3277.

Sincerely,

U.S. House of Representatives
Washington, DC 20515

Dear Congressman Crow:

Thank you for your letter dated April 20, 2022, cosigned by members of the Quiet Skies Caucus, regarding the membership of the NextGen Advisory Committee (NAC). The NAC is a Federal Advisory Committee that operates in accordance with the Federal Advisory Committee Act (FACA). FACA requires Federal advisory committees “to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee.” 5 U.S.C. app. 2 § 5.

As stated in the NAC charter and NAC membership balance plan, the mission of the NAC is to provide independent advice and recommendations to the Federal Aviation Administration (FAA) and to respond to specific tasks received directly from FAA. The advice, recommendations, and tasks relate to concepts, requirements, operational capabilities, the associated use of technology, and related considerations to operations that affect the future of the Air Traffic Management System and the integration of new technologies.

The NAC maintains a membership of no more than 30 members. For the FAA to comply with FACA’s membership balance requirements and to align its investments, the NAC must maintain broad representation of the aviation community. NAC members are appointed to represent stakeholder domains. The FAA has carefully considered the number of representatives required from each stakeholder domain to provide input on the technical issues the NAC considers. Of the 30 members, one is designated to represent the community and environment stakeholder group.

In the coming months, a Federal Register Notice (FRN) will be published to solicit NAC membership applications for the next two-year term. While the FRN supports a transparent, diverse, and inclusive membership solicitation process, the membership will remain fixed at 30 members with the same domain representation. We invite qualified organizations to apply. We do not believe expansion of the NAC is warranted, however, we do believe in substantive communication and engagement with communities and we remain committed to that work.

While the Advanced Aviation Advisory Committee (AAAC) recently expanded its membership from 35 to 41 members, at its expanded size of 41, there is one seat designated to represent the

community stakeholder group. This expansion brings the community representation for the AAAC in line with the long-established representation on the NAC.

A community concern raised in your letter focuses on the metric used to evaluate noise impacts. We understand that some members of the public have expressed views that the standard metric used by the FAA, the day-night average sound level (DNL), is insufficient for assessing community noise impacts. The FAA is currently undertaking a review of the FAA noise policy, including the noise metric and thresholds. However, the noise policy topic, including defining, updating, or evaluating noise metrics, is not within the scope of the NAC. The FAA will proactively engage stakeholders and the public in the review of the current noise policy through a robust, thorough, evidence-based, and inclusive process. This will include participation opportunities for all stakeholders, including those that represent local communities.

Fundamentally, the agency agrees community input is important. The FAA has taken a number of concrete actions recently that demonstrate our commitment to this concept. The agency deployed the noise complaint initiative nationwide, published the neighborhood environmental survey, and initiated a full review of our noise policy. The FAA has completed nearly every noise related directives in the 2018 FAA Reauthorization Act. Additionally, the FAA developed and implemented “enhanced community engagement” initiatives to include routine participation at multiple airport-sponsored noise roundtables focused on building consensus recommendations and engaging airport noise officers.

Thank you again for reaching out on this topic. We are in agreement that transparency and public inclusivity is of the utmost importance.

We have sent identical letters to all cosigners.

If you or your staff need further assistance, please contact the Office of Government and Industry Affairs at (202) 267-3277.

Sincerely,

The Honorable Jerrold Nadler
U.S. House of Representatives
Washington, DC 20515

Dear Congressman Nadler:

Thank you for your letter dated April 20, 2022, cosigned by members of the Quiet Skies Caucus, regarding the membership of the NextGen Advisory Committee (NAC). The NAC is a Federal Advisory Committee that operates in accordance with the Federal Advisory Committee Act (FACA). FACA requires Federal advisory committees “to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee.” 5 U.S.C. app. 2 § 5.

As stated in the NAC charter and NAC membership balance plan, the mission of the NAC is to provide independent advice and recommendations to the Federal Aviation Administration (FAA) and to respond to specific tasks received directly from FAA. The advice, recommendations, and tasks relate to concepts, requirements, operational capabilities, the associated use of technology, and related considerations to operations that affect the future of the Air Traffic Management System and the integration of new technologies.

The NAC maintains a membership of no more than 30 members. For the FAA to comply with FACA’s membership balance requirements and to align its investments, the NAC must maintain broad representation of the aviation community. NAC members are appointed to represent stakeholder domains. The FAA has carefully considered the number of representatives required from each stakeholder domain to provide input on the technical issues the NAC considers. Of the 30 members, one is designated to represent the community and environment stakeholder group.

In the coming months, a Federal Register Notice (FRN) will be published to solicit NAC membership applications for the next two-year term. While the FRN supports a transparent, diverse, and inclusive membership solicitation process, the membership will remain fixed at 30 members with the same domain representation. We invite qualified organizations to apply. We do not believe expansion of the NAC is warranted, however, we do believe in substantive communication and engagement with communities and we remain committed to that work.

While the Advanced Aviation Advisory Committee (AAAC) recently expanded its membership from 35 to 41 members, at its expanded size of 41, there is one seat designated to represent the

community stakeholder group. This expansion brings the community representation for the AAAC in line with the long-established representation on the NAC.

A community concern raised in your letter focuses on the metric used to evaluate noise impacts. We understand that some members of the public have expressed views that the standard metric used by the FAA, the day-night average sound level (DNL), is insufficient for assessing community noise impacts. The FAA is currently undertaking a review of the FAA noise policy, including the noise metric and thresholds. However, the noise policy topic, including defining, updating, or evaluating noise metrics, is not within the scope of the NAC. The FAA will proactively engage stakeholders and the public in the review of the current noise policy through a robust, thorough, evidence-based, and inclusive process. This will include participation opportunities for all stakeholders, including those that represent local communities.

Fundamentally, the agency agrees community input is important. The FAA has taken a number of concrete actions recently that demonstrate our commitment to this concept. The agency deployed the noise complaint initiative nationwide, published the neighborhood environmental survey, and initiated a full review of our noise policy. The FAA has completed nearly every noise related directives in the 2018 FAA Reauthorization Act. Additionally, the FAA developed and implemented “enhanced community engagement” initiatives to include routine participation at multiple airport-sponsored noise roundtables focused on building consensus recommendations and engaging airport noise officers.

Thank you again for reaching out on this topic. We are in agreement that transparency and public inclusivity is of the utmost importance.

We have sent identical letters to all cosigners.

If you or your staff need further assistance, please contact the Office of Government and Industry Affairs at (202) 267-3277.

Sincerely,

6/30/2022

The Honorable Joe Neguse
U.S. House of Representatives
Washington, DC 20515

Dear Congressman Neguse:

Thank you for your letter dated April 20, 2022, cosigned by members of the Quiet Skies Caucus, regarding the membership of the NextGen Advisory Committee (NAC). The NAC is a Federal Advisory Committee that operates in accordance with the Federal Advisory Committee Act (FACA). FACA requires Federal advisory committees “to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee.” 5 U.S.C. app. 2 § 5.

As stated in the NAC charter and NAC membership balance plan, the mission of the NAC is to provide independent advice and recommendations to the Federal Aviation Administration (FAA) and to respond to specific tasks received directly from FAA. The advice, recommendations, and tasks relate to concepts, requirements, operational capabilities, the associated use of technology, and related considerations to operations that affect the future of the Air Traffic Management System and the integration of new technologies.

The NAC maintains a membership of no more than 30 members. For the FAA to comply with FACA’s membership balance requirements and to align its investments, the NAC must maintain broad representation of the aviation community. NAC members are appointed to represent stakeholder domains. The FAA has carefully considered the number of representatives required from each stakeholder domain to provide input on the technical issues the NAC considers. Of the 30 members, one is designated to represent the community and environment stakeholder group.

In the coming months, a Federal Register Notice (FRN) will be published to solicit NAC membership applications for the next two-year term. While the FRN supports a transparent, diverse, and inclusive membership solicitation process, the membership will remain fixed at 30 members with the same domain representation. We invite qualified organizations to apply. We do not believe expansion of the NAC is warranted, however, we do believe in substantive communication and engagement with communities and we remain committed to that work.

While the Advanced Aviation Advisory Committee (AAAC) recently expanded its membership from 35 to 41 members, at its expanded size of 41, there is one seat designated to represent the
